

Dr Julie Bendavid

Dr Julie Bendavid has been a family dentist for 12 years, and brings experience and focus on creating a comfortable and relaxed environment for her patients. She received her Doctor of Dental Surgery Degree from University of Michigan, Ann Arbor, after earning her Bachelor Degree in Psychology. She has earned the confidence and trust of entire families, including children, teens, adults, and seniors.

CHANGE YOUR SMILE... CHANGE YOUR LIFE

TOWER HILL DENTAL

Facebook. Flickr. YouTube. Once upon a time, photos were relegated to albums collecting dust. But these days, thanks to the internet and social networking, every moment is a Kodak moment. So you might as well be ready. Arm yourself with your most potent weapon – your smile.

A smile is more powerful than a business card, more welcoming than a handshake. It expresses warmth and confidence, and tells the world that you are happy to be who you are. Ultimately, a smile creates a first impression that can last a lifetime. Unfortunately, many people are too scared to smile. Not because they're shy or unfriendly, but because of their teeth. Whether they're stained, discoloured, chipped or crooked, teeth can be a source of embarrassment that forces us to keep our mouths shut.

Veneers can reshape crowded or crooked teeth; bonding can fix imperfections or discoloration; ~~tooth~~ whitening can brighten your teeth with dramatic results in a matter of hours. Using the most advanced technology modern dentistry has to offer, ~~tooth~~ porcelain crowns can be designed and inserted in a single appointment. And implants can literally change your smile, and in

fact your overall wellness, overnight. By replacing missing teeth with comfortable and beautiful implants that closely resemble your natural teeth, you'll be amazed by the difference in your daily life. Eat corn on the cob to your heart's content and kiss your dentures goodbye!

Your time in the dental chair should be something to smile about. So learn more about fast, painless procedures and set up a personalized consultation.

That means you'll be ready for your Kodak moment. In an age when image is everything, showing off your brightest and whitest radiates a message — that you are warm, captivating and open for business. So smile! It may change your life.
